

Night Cover

FOR OPEN-AIR REFRIGERATED DISPLAY CASES

THE MOST DURABLE NIGHT COVER IN THE INDUSTRY

The GreenWize Advantage

- **ENERGY COST SAVINGS OF UP TO 35%**
Operating costs are reduced up to 35% every hour the cover is utilized
- **NO-FRAY COVER MATERIAL**
No more fraying on the sides of the night cover
- **ADJUSTABLE RETRACTION THUMB WHEEL**
Allows for easy adjustment of retraction without tools or removing/disassembly of night cover
- **OIL FREE BRAKE SYSTEM**
Hermetically sealed, food safe brake system allowing smooth and silent operation
- **INDUSTRY LEADING FIVE-YEAR WARRANTY**
Five year warranty on all components, subject to fair wear and tear
- **ENERGY REBATES**
GreenWizeNC is widely accepted where energy efficiency rebates are offered
- **"GO GREEN"**
GreenWizeNC offers a simple solution for retailers to do their part in participating in energy reducing measures

Night Cover Model NC

Cooler/ freezer open-air merchandiser applications

NIGHT COVERS ARE A SIMPLE METHOD TO SAVE ENERGY

GreenWizeNC night covers are a simple, but effective method to save energy on open air multi-deck and bunker merchandisers. By simply pulling the covers over the merchandisers during non-operating hours, you can realize up to 35% energy savings. When pulled down, the night cover assures that the air curtain of the refrigerated cases remains undisturbed, thus eliminating refrigerated air spill outside the case. The GreenWizeNC night covers also extend shelf life of merchandise.

FINALLY, A NIGHT COVER THAT HAS IT ALL

An industry leading five-year warranty, retraction tension adjustment and an upper limit stop are just some of the features that other ordinary night covers do not offer. The GreenWizeNC night cover is available in either OEM (no aluminum cover) or Cassette (aluminum cover). Custom lengths and colors are available as well as screen printing the cover material.

The night cover has an exclusive "thumb wheel" adjustment that allows customers to adjust the retraction speed without using tools or taking the night cover apart. The NO FRAY material of the night cover is UL 94 rated. In addition, the covers have the option of an upper limit stop adjustment that allows the customer to determine how far the cover will retract. All of these features assure the customer of a LONG LIFE night cover that will save energy for years and years.

Energy Saving Measures for Open Air Merchandisers

Specifications

Fabric:

Fabric drop blind 2120mm

A low emissivity aluminised polyethylene, polyester & HDPE cross weave fabric. Silver one side, grey one side. Available in non-perforated or perforated to suit climatic conditions.

Total weight: approx 209g/m sq mtr En 22 286

Tensile strength: MD 600 N/50 mm Din 53 354

CD 600 N/50 mm Din 53 354

Elongation: MD 30% Din 53 354

CD 15% Din 53 354

Tear strength: MD 150 N Din 53 363

CD 200 N Din 53 363

Puncture dia. 3.00mm: 125mj prEN 14 477

(from silver side, speed: 100 mm/min)

Emissivity: grey side 0,71 ASTM C 1341-04A
silver side 0,59 ASTM C 1341-04A

End Brackets: Powder coated metal

Spring Unit: Industrial quality with 1.4mm gauge coated spring steel

Braking System: Oil free hermetically sealed, food safe with thumb wheel retraction adjustment

Handles: High Quality impact resistant polymers

Bottom Pocket: Machined with thread and retained in aluminum extrusion by means of plastic extrude rod, eliminating the possibility of the rail being pulled off.

ENERGY SAVINGS MADE SIMPLE

Step 1: Mount the "L" bracket to desired location with 2 self-tapping screws

Step 2: Install the night cover assembly onto the "L" bracket

Step 3: Snap the aluminum cassette cover onto the "L" bracket

Step 4: Save Energy – and Money!
